### **Abstract of Proposed Collection**

This information collection is used for two main purposes: 1) the collection and submission of information required for DDTC approval of a reexport or retransfer; and 2) the collection and retention of certain information for authorizations and other approvals, including for reexports and retransfers under an Open General License (OGL) program. Under § 123.9(a) of the ITAR, unless an exemption applies, DDTC's written approval must be obtained before reselling, transferring, reexporting, retransferring, transshipping, or disposing of a defense article to any end-user, end-use, or destination other than as stated on the export license or in the Electronic Export Information filing in cases where an exemption was claimed. Such approval is normally granted through case-by-case review of requests to authorize specific transfers. In addition, ITAR § 120.22(b) allows DDTC to provide export authorization for DDTC's own initiatives, including pilot programs and other specifically anticipated circumstances for which DDTC considers special authorizations appropriate. DDTC has launched a pilot program pursuant to its authorities in ITAR § 120.22(b) in order to assess the concept of an OGL mechanism by which it may authorize certain transfers of defense articles to predetermined parties. OGLs eliminate the need for the Department to individually review and approve certain lower-risk transactions involving certain recipients. DDTC believes the OGL program will provide unprecedented flexibility for the U.S. defense industry and U.S. allies to operate consistent with the ITAR and will enhance their ability to maintain, repair, and store defense articles.

Under ITAR § 123.1(c), DDTC may require pertinent documentation regarding the proposed transaction and proper completion of the application form, including

information about the quantity and value of the defense article proposed for export and information on the proposed end-user, end-use, and ultimate destination. Under ITAR § 123.9(c), persons who seek approval from DDTC to reexport or retransfer defense articles are required to submit a description, quantity, and value of the defense article and a description and identification of the new end-user, end-use, and destination. Under ITAR § 120.15(e) any person engaging in any reexport or retransfer of a defense article pursuant to an exemption must maintain records of each such transfer including the following information: A description of the defense article, including technical data, or defense service; the name and address of the end-user and other available contact information (e.g., telephone number and e-mail address); the name of the natural person responsible for the transaction; the stated end-use of the defense article or defense service; the date of the transaction; and the method of transmission.

DDTC seeks to ensure that persons who rely on any current or future OGLs to conduct reexports and retransfers abroad retain the same records as would be required if their transactions were authorized by either a specific license or an exemption. Accordingly, DDTC has restated the record-keeping requirements articulated in ITAR § 120.15(e) in the OGLs themselves.

## **Methodology**

Respondents will submit information as attachments to relevant license applications or requests for other approval. Applicants are referred to ITAR § 123.9 for guidance on what information to submit regarding the request to change end-user, end-use and/or destination of hardware. This information may be submitted electronically via a DS-6004, Reexport/Retransfer Application, through DDTC's case management system, the Defense Export Control and Compliance System (DECCS).

Separately, as described in ITAR § 120.15(e) and under the OGL pilot program and as described in each OGL, respondents will be required to retain certain information in their own records for a period of five years from the date of the reexport or retransfer.

**Authority:** 44 U.S.C. 3507.
